-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The abstract of the disclosure is objected to because of legal phraseology, line 1, "disclosed is" should be deleted. Correction is required.

On page 1 of the specification, the continuation data is missing. It should be corrected.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Nagata et al, US Patent No. 6,527,187.

Nagata et al teaches a card reader comprising: a shutter member 105 in a manual card reader 101; a rotating stopper piece 118 and a plunger 117; when a card 106 is inserted along the guide portions 109, first the magnetic head 110 detects magnetic data and the solenoid 116 is electrified; the plunger 117 is attracted to the solenoid, the engagement thereof with the stopper piece 118 is canceled, and the shutter member 105 becomes rotatable; the card 106 is

inserted up to the card stopping position, pushing the shutter member 105 to open against the spring force of the twisted coil spring 115; when the card 106 is removed completely from the manual card reader 101, the solenoid is turned off and the plunger 117 is returned to the original position; the shutter member 105 is again locked with the engagement between the plunger 117 and the stopper piece 118; the shutter member 105 can be modified into shutter 121; the shutter member 121 is arranged such that a rotation axis 125 of the shutter member 121 is positioned on the card incoming side to close the card inlet 103; a stopper piece 122 is unlocked only when an appropriate card 106 is inserted, and the shutter member 121 becomes rotatable; the shutter member 121 can be configured to return to the original position with the spring force of a spring member 126. (see figs. 4-7).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 7,370,804 and 6,616,050.
